
UHMW POLY CHAIN TIGHTENERS

POLY GIVES LONGER LIFE TO THE CHAIN AND OUTLASTS WOOD BLOCKS.

These rollers and tighteners have unlimited use in areas where there are tighteners. Replace wood with self lubricating, long wearing poly tighteners.

Stronger and more durable than factory plastic

Made of 100% UHMW Poly for added strength, these chain tighteners last three to five times longer than black plastic.

Poly works well with metal to prolong equipment life

The poly wears against the metal and supplies a drag free surface the metal can move over freely.

Other shapes and sizes can be made upon request. Please send pattern and measurements.
