May Wes Helps You Lower Your Operating Costs

“Thank You for Your Business. We Will Continue to Earn It.”

We know you are going through hard times this year and we are here to help.

During times like these, it's important to keep equipment running longer and squeeze the most out of every dollar. Every product in this catalog will help you lower your operating costs by extending the life of your equipment and increasing its efficiency.

Keep older corn heads running years longer with GVL Poly Snouts. Breathe new life into grain platforms with fresh UHMW skid shoes and auger trough liners. Protect expensive tires and tracks with G4 Stalk Stompers. Clean and reuse air filters with an Air Filter Blaster. Salvage a short crop with 5 Finger Quick Tines. Test crops with a Mini Combine™ to save fuel.

These are just a few examples of how May Wes can help improve your bottom line.

We've added several new products to help you get more out of your equipment. Use your corn planter to plant cover crops and small grains with SeedRight™ Seed Plates. Stop feeding the deer and invest in Kernel Keeper™ to put more corn in the combine. Throw an inexpensive Skid Hitch on your skidloader to move trailers and carts around the farmyard with ease.

In addition, we've expanded our popular skid shoe lineup with skid shoes for Honey Bee and AGCO 9255 platforms, and we offer competitively priced cutterbar skid shoes for Case IH, New Holland and MacDon.

May Wes has hundreds of products to help you stretch your budget and get through this downturn. You will find them in this catalog and even more at maywes.com. If you have any questions, your May Wes sales team is here to help. You'll also find dozens of helpful FAQ and installation videos at youtube.com/maywesmn.

All of us at May Wes wish you a safe and profitable harvest. Thank you for your business. We will continue to earn it.

Jack Daggett

MAY WES POLICIES & PROCEDURES

Scope: These policies apply to all business units operating under the Pride Solutions LLC company. Namely: May Wes Manufacturing, C&A Pro Skis, Pride Engineered Plastics and Pride Assembly.

Prices & Terms: Prices and availability are subject to change without notice. All shipments are billed at the price prevailing at the time of shipment. Payment terms are agreed upon prior to or at time of sales and will be listed on the invoice. In the event of non-payment, the buyer shall pay any and all collection costs, including attorney fees.

Payment types currently accepted include Visa, Mastercard, Discover, American Express, Cash or Check.

Shipment: All orders will be shipped in the order they are received. Orders can be shipped UPS ground, UPS second day air, UPS next day air or any other available means (including Spee-Dee where suitable). Truck freight will be used when price competitive to UPS or when weight/size dictate otherwise. Pride Solutions is not responsible for goods damaged or lost in transit. We will work with the carrier to resolve the problem.

Warranty: Pride Solutions warrants the product to be free of material and workmanship defects which are apparent upon receipt and initial use of the product. Wear items such as liners, skid shoes and bearings are guaranteed for a reasonable run time, not to exceed one year from the date of purchase. Warranty claims must be reported within 15 days of occurrence of defect. Warranty does not cover damage from improper installation or unintended use of the product. Pride Solutions does not accept responsibility for any damages incurred on the equipment to which the product is applied. The warranty value is limited to the purchase price of the merchandise. No incidental, consequential, indirect losses or

damages, expressed or implied, are covered. A warranty claim must be processed with either return of the defective product or reasonable proof that the product failed. Items returned for warranty must be accompanied by a Return Material Authorization (RMA) obtained from Pride Solutions customer service at 1-800-788-6483. If the end user purchased from a dealer or authorized distributor, the dealer or authorized distributor must make the warranty claim. Defective product will be replaced with same or better product. Account credit will be given when a reasonable replacement cannot be provided.

Returns: Merchandise returned for credit must be returned within 90 days of receipt. If the end user purchased from a dealer or authorized distributor, the dealer or authorized distributor must initiate the return. All returns must be accompanied by a Return Material Authorization (RMA) number issued by a Pride Solutions customer service representative at 1-800-788-6483. Pride Solutions is not responsible for freight charges and may assess up to a 25% restocking fee for all properly filled orders. In the event of wrong and/or missing parts on an order, the restocking fee is waived and Pride Solutions will pay freight. Merchandise must be returned complete and unused, including hardware. The customer account will be credited the purchase price of the merchandise less the restocking fee (if applicable).

The Big Swede Reviews G4 Stalk Stompers

Watch now!

Millennial Farmer - John Deere 612C

Field Tested. Farmer Approved.

"Tires and tracks for combines have gotten really expensive. That's why we protect ours with May Wes G4 Stalk Stompers. They do a really good job of leveling out the stalks, even when conditions are frozen or wet."

-Zach Johnson, MN Millennial Farmer

Proudly Made in the U.S.A.

POLY CUTTING EDGE

STOP SCRATCHING YOUR ASPHALT!

Snow Plows, Snow Pushers & Buckets

Slick & Durable UHMW Poly Protects Pavement from Plow Damage

Horizontal Application - Beveled on both sides. Optional counterbored holes.

ORDER ONLINE WITH OUR NEW CONFIGURATOR TOOL AT MAYWES.COM

Vertical Application - Unbeveled. Optional drilled holes.

"We decided to make the switch from metal cutting edges to the May Wes Poly Cutting Edge in an effort to prevent scuffing our new sidewalks. May Wes helped us figure out the proper Poly Cutting Edge size requirements to fit our particular snow blowers and plow blades. We like how the poly material flexes when the blade hits uneven sidewalks, preventing the shock on the equipment and chipping the concrete. We are satisfied with the service from May Wes and the quick product shipment."

Mike Drew, Park Superintendent
City of Glencoe, MN

Featured by Fast Ag Montana, Larson Farms, Stanley the Dirt Monkey and Finstad Skidloader Service

Made in the U.S.A.

4 Tractor Stompers

STUBBLE DAMAGE PROTECTION
STALK STOMPERS FOR TRACTORS

WORKS OFF OF EXISTING TRACTOR HYDRAULICS

- Use an existing open remote to control the Stalk Stompers, allowing independent control and float operation.
- Plumb a Tee into existing implement lines so that the Stompers raise and lower automatically with your implement.

KIT IS BUILT AROUND A STANDARD 4" X 4" TOOLBAR

You have the option to supply your own 4" x 4" toolbar or you can purchase through May Wes. (Oversize shipping charges will apply.)

NO DRILLING OR WELDING REQUIRED!

Designed for quick assembly and doesn't typically require welding or drilling.

ROW-CROP CONFIGURATION

Great for knocking down stalks when planting in no-till applications.

Stalk Stompers Promote Residue Decomposition!

TRACTOR STALK STOMPER KITS WITH MOUNTS

Multiple Shoe Widths Available: 24" or 36"

• Toolbar is available for purchase separately.
(See page 38)

Featuring **Fast Ag Montana**

HOW DOES IT WORK?

The BaleSkiis® Baler Liner covers the bale-forming chamber with a specially designed, self-adjusting material and an anti-springback pattern machined into the product uniformly compresses the hay and keeps it compressed when the baler plunger retracts. This ensures a constant uniform movement and compression of hay through the bale chamber. This means that the hay is not moving back and forth in the chamber breaking leaves off stems.

- Puts more high protein leaves in the bale - not on the ground.
- Puts more pounds per acre in the bale - not on the ground.
- Reduces the amount of tension in your bale chamber.
- Stops bale chamber plugging & buildup.
- Eliminates wear on your bale chamber.
- Reduces horsepower and fuel consumption.

*Heavy material kits are recommended for those baling in rough forage, and/or very abrasive soils and/or extreme temperatures.

Please contact us if your baler has other modifications or if you do not see your baler model listed here. BaleSkiis are available for any make/model of square baler. Unless noted, all kits are available in heavy or regular material.

If you will be baling corn stalks, ask for the "Corn Kit" add-on, at no extra cost at the time of ordering. Extra costs are incurred if ordered as a separate item later.

PREMIUM POLY SKID SHOES - HARDWARE INCLUDED

EXTEND THE LIFE OF YOUR HEAD AND PUT MORE CROP IN THE COMBINE.

FORMED TO FIT. PREDRILLED COUNTERBORED HOLES. HARDWARE INCLUDED.

Poly Skid Shoes prevent soil and debris build-up on the underside of your combine head. The smooth, slick surface allows you to run your head and cutterbar down as low as possible, leaving little to no crop in the field. Durable UHMW skid shoes protect your OEM metal skid plates, extending the life of your head.

MACHINE CUT FROM SOLID SHEETS OF UHMW POLY OR COMPRESSION MOLDED TO FIT YOUR HEAD.

Predrilled & Counterbored Holes Protect Hardware. All Hardware is Included with Skid Shoes.

NEW

CUTTERBAR SKID SHOES

Sold individually or in packs of 10. Reuse your OEM hardware.

Dynaflex Header Field Campaign:

A Field Campaign was announced in November 2011 for the Dynaflex Header Platform affecting the serial numbers listed below. This campaign updates the skid shoe configuration from a low profile to a high profile. **Please verify with an AGCO Dealer** if this change has been incorporated on your Dynaflex Head. If this change has been implemented, please order poly skid shoes for the following serial number break: CHD01101-FHD01100 High Profile (Page 89)

Serial Numbers Involved:

Model	Serial Range	Configuration
Challenger	FDH	Prior to AGCCFDH00BHD01514
Gleaner	9250	Prior to AGCR92500BHD01530
Massey Ferguson	9250	Prior to AGCM92500BHD01520

CHAFF SPREADERS FOR CASE IH 1400-2500 SERIES

Flat Arm for Chaff Pan

Pre-load Plate

Chaff Pan Cover (Bubble Pan shown)

Extended Hex Shafts

Bottom Discs, Drums & Spreader Bats

Chaff Spreader Kit example shown above. Kits include Sieve Easy Adjust Kit (page 98).

HIGH PEAK DIVERTS CHAFF TO EACH SPREADER.

Spread chaff over a 16 foot area

Eliminates two rows of chaff bed your plow will have to cut through in the future. Spreading the chaff evenly helps break down compost material quicker. These dual spreaders work well on both corn & bean debris. There are no hydraulic motors to tap into the hydraulic lines that rob your combine of power.

CHAFF SPREADER - COMPLETE UNIT

Plates come pre-drilled and hardware is included.

FEEDERHOUSE SILENCER KITS FOR CASE IH

REDUCE THE RATTLE AND CLATTER OF METAL ON METAL, GRAIN ON METAL & CHAIN ON METAL

Kits include: Throat liner, drum guards, rails and top sprocket stripper plates.

THROAT LINING

Grain feeds into combine over the slick poly and helps prevent bunching in the throat. The poly does not corrode like metal and provides a smooth surface, even when placed over corroded metal. The echo from the metal on the bottom is absorbed by the poly lining, which is form-fitted to cover the existing metal.

DRUM GUARDS

Soft plastic, rubber-like material is used to cover the metal drum where the chain hits. Saves the chain from excessive wear on the drum and decreases noise.

RAILS

Cover existing metal rails with poly rails. This helps prevent clattering of metal on metal as the bars on the feederhouse chain hit the metal rails. Poly rails cushion the impact of metal for less wear on rails and bars.

TOP SPROCKET STRIPPER PLATES

As the chain goes around the metal plate, it wears grooves into the metal and flattens the bottom of the chain. With poly plates, the chain glides across the poly and helps retain the shape of the chain. The chain will not clang against poly as it does the metal. Replace metal stripper plates with poly plates.

CLEAN GRAIN ELEVATOR POLY PADDLES

MAY WES POLY PADDLES OUTPERFORM FACTORY RUBBER & STEEL PADDLES

Rigid elevator poly paddles do not bend back like rubber, which allows grain to fall back down the elevator. (see illustrations on right)

Extend the life of your elevator tin.

As the Poly Paddles move through the elevator, they leave a protective coating, reducing friction and wear.

- For Clean Grain Elevators
- Replacement Parts; Paddles & Chains
- Complete Kits of Paddles with the Chain
- 1/4" Thick (Unless Specified)

A. Grain flow with factory rubber paddles.
B. Grain flow with May Wes poly paddles installed.

POLY CORN SNOOTS

PROVEN TO OUTPERFORM AND OUTLAST

Replace your existing metal or worn out poly corn gatherers with **GVL Poly Corn Snouts** and reap the benefits!

DESIGN INNOVATIONS:

- **Pivot Points**
 - Folds Up, In & Down
- **Easy Access for Cleaning & Maintenance**
- **Deeper Shoulders for Better Crop Retention**
- **Complete Poly Construction**
 - Inner & Outer Walls
- **Replace One Snout or Outfit the Whole Head**
- **Interchangeable**
- **Complete with Hardware for Easy Installation**

ADVANTAGES OF POLY MATERIAL COMPARED TO METAL:

- **More Economical & Weighs Less**
- **Absorbs Impact**
 - Less Bounce & Denting
- **Slick Surface Sheds Debris**
- **Less Ear Bounce & Butt Shelling**
- **Works Well in Down-Corn Situations**

ADDED FEATURES OF THE JACK-KNIFE DESIGN:

- **Folding Design Allows Snouts to be Popped Up & Latched in Seconds**
- **Easier Transport & Storage Positions**
- **Advanced Prop Rod System with Safety Lock Pin**

SERIES 1 - RIGID DESIGN

FOLDS UP FOR EASY ACCESS

Complete OEM Replacement with Rigid Design

Single pivot point allows snout to lift for easy access for maintenance.

SERIES 2 - JACK-KNIFE DESIGN

FOLDS UP, IN & DOWN

Complete OEM Replacement with Jack-Knife Design

Double pivot points allow the points to fold up, in and down for easy access for maintenance and uses less storage space.

Series I Back Poly has holes in the rear for the rear hold-down pin to go through.

Series II Back Poly is slanted, without holes in the rear.

PREVENT DAMAGE TO COMBINE SNOOTS

The curved design for hollow points is used to lift the point off the ground and create a larger surface area for ground contact. This feature keeps the snout from digging into the dirt and wrinkling the snout, which results in costly repair or replacement.

Inside & Outside Snouts for Case IH 2200/2400/3200/3400

AUGER TROUGH LINERS FOR CORN HEADS - 1/8" THICK

DURABLE POLY WON'T RUST.

May Wes Auger Trough Liners

cover the full length of the floor under the auger – not just the feed opening.

Condensation and wet corn will not corrode poly lining when the metal is covered with poly. Even when metal lining is corroded, the poly lining keeps loose grain from falling through rust holes and feeds grain evenly into the throat of the combine.

Poly lining is much easier to replace than factory metal.

Simply drill and rivet into place.

KERNEL KEEPER™

EXPANDED LINEUP

CUSHION AND CAPTURE TO REDUCE KERNEL SHATTER AND PUT MORE KERNELS IN YOUR COMBINE.

HOW DOES IT WORK?

1. Dampener rails cushion the impact of the ear on the deck plate, absorbing the energy and resulting in fewer kernels dislodging from the ear.
2. Rails also capture any dislodged kernels before they can slide between the deck plates.
3. Brushes sweep the captured kernels into the auger bed and into the combine.

CALCULATE YOUR SAVINGS

Head Size	6	8	12	16	
Cost of Product	\$1170	\$1560	\$2340	\$3120	
Life of Product (Acres)	900	1,200	1,800	2,400

Savings per Acre	Bushel Price	Estimated Returns			
	\$4.00	\$4,230	\$5,640	\$8,460	\$11,280
Bushels: 1.5	\$5.00	\$5,580	\$7,440	\$11,160	\$14,880
	\$6.00	\$6,930	\$9,240	\$13,860	\$18,480
	\$7.00	\$8,280	\$11,040	\$16,560	\$22,080

SAVE OVER \$500 PER ROW VS THE COMPETITION

At \$195 per row, we offer the most cost effective solution to head loss on the market. **The Kernel Keeper is profitable at just 1/3 bushel savings per acre, while average head loss is 2-3 bushels per acre.**

Lower band of savings based on average loss and % kernels saved in field testing.

EAR SAVERS

PREVENT LOOSE CORN EARS FROM SLIDING OVER THE GATHERING CHAINS TO THE GROUND

WHAT MAKES OUR EAR SAVERS BETTER?

- Better Memory Than Factory Rubber
- Will Not Fold Back Like Factory Ear Savers
Once the corn is in, it won't push back through the gate
- Stays Rigid and Works Like A Gate,
yet soft enough to let corn go through without knocking the ears off the corn stalk.

AUGER TROUGH LINERS FOR GRAIN HEADS - 1/4" THICK

DURABLE POLY WON'T RUST.

May Wes Auger Trough Liners

Cover the full length of the floor under the auger - not just the feed opening.

Condensation and wet grain will not corrode poly lining when the metal is covered with poly. Even when the metal lining is corroded, the poly lining keeps loose grain from falling through rust holes and feeds grain evenly into the throat of the combine.

Poly lining is much easier to replace than factory metal. Simply drill and rivet into place.

RETRACTABLE POLY FINGERS FOR GRAIN HEADS

THE COMMON SENSE AUGER FINGER REPLACEMENT CHOICE

May Wes Poly Retractable Fingers OUTPERFORM metal on multiple levels

STRONG & RESILIENT

May Wes Poly Retractable Fingers will not fray with heavy usage. These fingers are flexible and will bend past the breaking point of metal fingers.

NO HARM to your combine

Bent metal fingers can gouge and poke through the auger. Broken metal fingers can do costly damage to the drum and thresher system. The advantage poly fingers have over metal is when they eventually break, the poly will disintegrate as it passes through the combine and will not damage the internal working parts like rotors and cylinders.

COST EFFECTIVE

Poly fingers are less expensive than metal.

AUGER WEARSHOES

Bolt-on Poly for New or Worn Steel Auger Flighting

- Combines
- Grain Carts
- Transport Augers & More

Complete Upgrade of Combine Grain Tank when paired with GRAIN TANK AUGER TROUGH LINER - See page 93

HIGH ABRASION RESISTANCE

PROTECT METAL AGAINST WEAR & CORROSION

Typical applications include combines, grain carts, transport augers, grain bin augers and grain handling systems - wherever high volume and wear are issues.

A size to fit all
Available in different diameters, pitches and thicknesses to fit most common augers. They are pre-formed and predrilled for easy installation. They join together using a patented bevel lap joint and are bolted to the auger with special UHMW-capped bolts which are counter sunk for a smooth surface.

Smooth even flow of grain
Smooth poly provides a slick surface for grain to flow freely, reducing grain cracking, bunching and build up. The result: faster auger speeds and improved harvesting rates.

AUGER WEARSHOES - CUSTOM APPLICATION

SOLD PER PITCH

NOT FINDING YOUR WEARSHOE SIZE?

CUSTOM ORDERS WELCOMED

Wearshoe Ordering Information

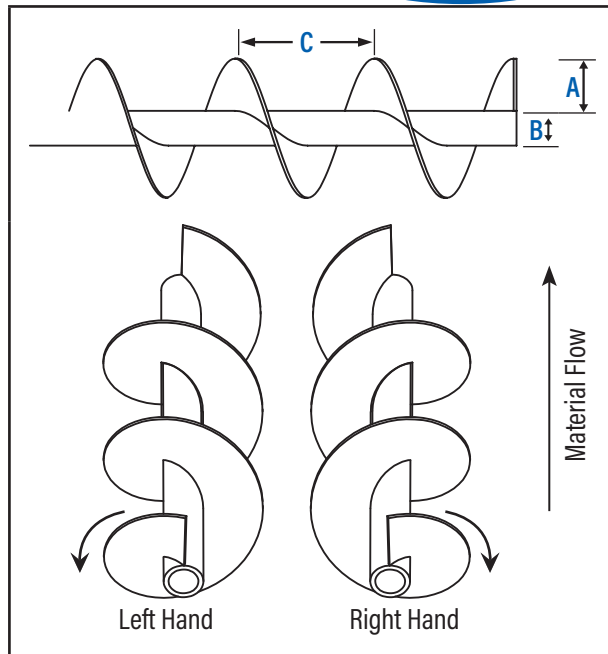

When ordering for combines or grain carts, we will need to know the following information:

- Model Year
- Brand
- Model Number
- Type of Auger you want to cover

(Example: 1992 John Deere 9600 Tank Fill Auger)

If it is an auger size we don't have listed, we can identify the right parts with the measurements listed below:

- Flight Height**
Reference Measurement A
Note: Flight Height x 2 + Center Tube Diameter = Flighting Diameter
- Outside Diameter of Center Shaft/Tube**
Reference Measurement B
- Pitch** (Space Between Flights)
Reference Measurement C
Note: When measuring pitch, be sure to keep the tape measure parallel with the center shaft/tube.
- Left Hand or Right Hand**
Reference graphic on right to determine if you have a left hand or right hand auger.

PLEASE BE ACCURATE WITH YOUR WEARSHOE ORDERING INFORMATION

A 25% RESTOCKING FEE IS CHARGED FOR ALL RETURNS ON OUR STOCK SIZES.

NO RETURNS ACCEPTED ON CUSTOM-MADE ORDERS

SHANK SAVERS - 1/4" THICK

CREATE IDEAL SOIL CONDITIONS

POLY SHANK SAVERS FOR SWEEP PLOWS

PART NO	DESCRIPTION	SIZE	RETAIL PRICE
80688	Undercutter V-Plow	9 1/2" x 22"	\$ 42 ea

As the V-plow undercuts the ground, the poly Shank Saver lessens the furrowing of the soil. It helps keep the top soil undisturbed as well as creates a uniform and shallow depth on final operation before planting. Shields are large enough for the anhydrous sprayer tubes to fit between the Shank Saver and the shank.

PRO CHUTE

Slide Gate Controls Flow

PART NO	DESCRIPTION	SIZE	RETAIL PRICE
82652	PRO Chute - Yellow	7 1/2" x 62"	\$ 525 ea
82653	PRO Chute II - Blue	10 1/2" x 62"	\$ 525 ea

EMPTY SEED BOXES DIRECTLY INTO YOUR PLANTER

- Made of UHMW
- Empty Seed Box in as little as Two Minutes with PRO Chute II
- Snaps onto Seed Box Quickly
- 79" of Clearance from Lift to End for Maximum Clearance

SHANK PROTECTORS - 1/4" THICK

PROTECT CRITICAL STRESS POINT ON METAL SHANK FROM EXCESSIVE WEAR

As soil conditions vary from field to field, you can protect from abrasion and prevent build-up of mud and residue by covering with May Wes Non-Stick Poly Shank Protectors.

OPERATE EFFICIENTLY & SAVE FUEL

The non-stick poly surface lets the shank and attached shovel glide through sticky soil. It resists friction that causes dragging when cultivating and digging.

CLOSING WHEELS

LIFETIME WARRANTY*
 against breakage during standard farming practices.
*Does not include hub or bearing.

MAY WES POLY CLOSING WHEELS LAST LONGER & WEAR BETTER

TOUGH. Eliminates Breakage **DURABLE.** Absorbs Impact & Prevents Corrosion
SLICK. Reduces Build-Up & Drag **OUTPERFORMS.** Replacement for Factory Closing Wheels

Star Wheels

About Star Wheels:

- Crumbles Compacted Soil
- Applications for Planter Closing Wheel & Row Cleaner

G2 STAR WHEEL

- Improved Design
- Shorter Points
- Catch Less Debris
- 13 1/2" Outside Diameter

Compaction causes poor root base and slows emergence

May Wes Closing Wheels close the seed furrow without compaction

Key Material Features of UHMW:

- UHMW is exceedingly strong and durable.
- UHMW Wheels/Fingers deflect when encountering objects, but will return to their original molded position (shape memory).
- UHMW does not corrode like steel and stays cleaner due to the non-stick poly surface.

PLANTER BOX TOPPERS & HINGES

ONE PIECE DESIGN

- Fits 1.6 Bushel Planter Boxes Only
- Adds 1 Bushel Capacity
- Watertight Fit Prevents Seed Loss During Transport
- Use Original Lid - Fits Tight Preventing Lid Loss

Planter Box Hinges

Attach directly to your existing planter box and lid to secure lid to the box.

SEED FILL TUBES - NON-TELESCOPING

Bulk Seed Fill Tubes are perfect for bulk fill applications where extended telescoping lengths are not required. They are compact yet flexible to allow easy positioning of the tube. These one-piece tubes make loading your bulk fill planter easy.

NON-TELESCOPING BULK SEED FILL TUBE WITH HANDLE

Available in 4 Ft. Length & Auger Diameters of 6", 7" & 8"

All non-telescoping tubes include flex hose, clamp & handle.

PART NO	DESCRIPTION	SIZE	RETAIL PRICE

POLY CUPPED & STRAIGHT AUGER FLIGHTING

All Right Hand Flighting Only

THE PROVEN CHOICE FOR BULK GRAIN SEED HANDLING

5" - 6" - 7" - 9" POLY CUPPED AUGERS FOR:

- SEED TENDERS
- GRAVITY BOX AUGERS
- TRUCK MOUNT TAILGATE AUGERS
- AIR SEED FILL AUGERS
- TRANSPORT AUGERS
- BIN UNLOAD AUGERS

Poly Cupped Auger Flighting

Protecting your grain and seed from auger handling and damage is a no-brainer. University testing has proven Poly Cupped Flighting to have **5-times lower soybean seed cracking** as compared to factory steel (reference chart below). Poly Cupped Flighting is ideal for gentle handling of bulk grain and seeds, such as soybeans, popcorn, edible peas, lentils and white corn.

Poly Straight Auger Flighting

Provides an economical way to replace your outdated steel auger and upgrade to the industry best! Perfect for tough jobs of transferring fertilizer and corrosive materials. The High Density Polyethylene (HDPE) material is also safe for food handling.

Soybean Crack Test Results

Flighting Type	Percent Breakage	Average Breakage
Plastic Cup	0.38 %	38
Bristle	0.35 %	35
Steel	1.80%	180
Steel Cup	2.10%	210

Average breakage based on per 10,000 beans. Test ran with hydraulic motor at 12 gal/min (6" x 13' uni-swivel auger at a 45° angle). Average moisture content of the bean seed sample was 12%. Reprinted with permission from J&M Manufacturing Co.

HOW TO ORDER

VERTICAL OR HORIZONTAL CUTTING EDGE

Information to know before calling

- A. Cutting Edge Length _____
- B. Quantity of holes _____
- C. Distance from edge to center of each hole _____

No Returns Accepted on Custom Orders

SLICK AND DURABLE UHMW POLY PROTECTS PAVEMENT FROM PLOW DAMAGE

HORIZONTAL POLY CUTTING EDGE FOR BUCKETS AND SKID LOADERS

Beveled on Both Sides · Optional Counterbored Holes

PROTECT PAVEMENT FROM EQUIPMENT DAMAGE

- Designed to Protect Smooth, Hard Surfaces such as cobblestone and some pavements that can be damaged by equipment. Not designed for continual use on rough surfaces.
- Non-Stick UHMW Poly Surface Reduces Debris Build-Up
- Prevents Scuffing Concrete or Cobblestone Sidewalks
- Less Shock to Equipment in Uneven Concrete Conditions
- Lightweight Compared to Metal Cutting Edges
- Simple Installation & Maintenance-Free Operation

AIR FILTER BLASTER

EXTEND THE LIFE OF YOUR FILTERS

- Reduces fuel consumption
- Increases the life of your equipment
- Increases engine performance

Safe For Filters

The distribution of air allows a maximum of 48 psi to come out of any one air jacket in the Filter Blaster. Testing has proven the filters can withstand many Air Filter Blaster uses.

Saves You Money

Reduces filter replacement costs and landfill charges, which improves your bottom line.

COMPLETE KIT		
PART NO	DESCRIPTION	RETAIL PRICE
83685	Air Filter Blaster with 6" Rotor	\$ 299 kit

OPTIONAL ACCESSORIES
